

Parent Information Sheet

Infants with Injury, Burn or Ingestion

PLEASE READ

Medical staff seeing **all** infants (less than 2 years of age) with any injury, burn or ingestion are **required** to ask a **set of specific** questions.

These questions aim to find out how the injury/burn/ingestion occurred. These questions are necessary to ensure the best care of your child and are asked of **every** parent or carer. The questions will only take 5 to 10 minutes to answer and will be included in the examination of your child.

If there are any concerns about the questions please tell medical staff. We appreciate your co-operation.
