

Ethics for Research

Obstacle or Powerful Tool to Enhance Design and Conduct?

Ethics in research is often perceived as a hurdle to be struggled over.

Dr Nik Zeps

This seminar will show how it can be embraced by researchers as a powerful tool to enhance study design and conduct. It will empower researchers to think in ethical terms without seeing themselves as “bio-ethicists”.

Nik is the Group Director of Research at Epworth HealthCare in Melbourne and a former member (2006-2012) of the Australian Health Ethics Committee of the National Health and Medical Research Council (NHMRC) of Australia.

He is the Australian Representative on the Ethics and Governance Committee of the International Cancer Genome Consortium and has been a member of Human Research Ethics Committees since 2002.

Friday, 7 April 2017

12:30 PM – 1:30 PM

Princess Margaret Hospital

Macdonald Lecture Theatre

hosted videoconference site:

Fiona Stanley Hospital
