Enquiries :

Dr Janice Lim
Communicable Disease Control
Department of Health
189 Royal Street
EAST PERTH WA 6004

Dear Dr Lim

Thank you for your application received 8 August 2020 to conduct research on Department of Education sites.

The focus and outcomes of your research project, *Evaluation of the process of reporting the immunisation status of children for No Jab No Play*, are of interest to the Department. I give permission for you to approach public school principals to invite their participation in the project as outlined in your application.

This approval only applies to Western Australian public schools and community kindergartens. It does not apply to non-government schools, or childcare programs on or off school sites, which the WA Department of Education does not have any jurisdiction over.

This permission is also subject to the following conditions:

- A copy of this letter to be provided to the principals when requesting their participation in the research.
- Participation in your research project will be the decision of the schools invited to participate and individual staff members.
- Upon conclusion, the results of this study are forwarded to the Department at the email address below.
- Any proposed changes to the research project will need to be submitted for Department approval prior to implementation.

Responsibility for quality control of ethics and methodology of the proposed research resides with the institution supervising the research, i.e. Department of Health (Western Australia).

Please contact Dr Alesya Challenor, A/Principal Consultant, Research, on (08)9264 5512 or researchandpolicy@education.wa.edu.au if you have further enquiries.

Very best wishes for the successful completion of your project.

Yours sincerely

DALE MILLER
A/DIRECTOR
SYSTEM AND SCHOOL PERFORMANCE
