

Enrolling an exempt child (family circumstances)

Exemption Eligibility Form

The Exemption Eligibility Form is a resource for persons in charge of child care services, pre-kindergarten and kindergarten programs to determine a child's eligibility for enrolment as an exempt child because of a particular family circumstance.

An **exempt child** is any child who, at the time of enrolment, meets the description of a class of children prescribed in regulation 10AB of the *Public Health Regulations 2017*.

When to use the Exemption Eligibility Form

This form should only be used in a situation where:

- a child is applying to enrol into a long day care, family day care, pre-kindergarten or kindergarten, and
- the child's immunisation status is 'not up to date' according to their AIR Immunisation History Statement, and
- the child is not following a 'catch up schedule' prescribed by the regulation, and
- the child does not have an immunisation certificate issued or declared by the Chief Health Officer.

Persons in charge should be aware that some of the questions on this form:

- may have already been asked on other enrolment documentation, and if this is the case, this form may not be necessary, and
- may raise sensitive issues about a family's circumstances, and therefore these matters should be handled with appropriate care.

Advice for parents/guardians

Staff may be required to explain to a parent/guardian why additional information about the child is being requested. The following may need to be discussed:

- Information may be needed to determine whether the child is an exempt child.
- This determination permits the child care service, kindergarten or school to enrol the child despite the child not:
 - having an 'up-to-date' AIR Immunisation History Statement, dated no more than two months old

- being on a catch up schedule as indicated by an AIR Immunisation History Form dated no more than six months old; or
 - having a valid immunisation certificate issued by or declared by the Chief Health Officer.
- The Department of Health intends to contact the families of exempt children to provide support in accessing local immunisation services to get the child caught up on overdue vaccinations.
 - This exemption is only for the current enrolment and any future enrolments at other child care services, pre-kindergarten and kindergarten programs will require a new assessment.

How to assess eligibility

The Exemption Eligibility Form provides examples of supporting evidence which a parent/guardian may provide at enrolment in order to satisfy the person in charge that their child is an exempt child; an exempt child may be permitted to enrol.

For more information, refer to the *WA Immunisation Requirements – Guidelines*, Section 3.2: Exempt children because of particular family circumstances and suggested supporting evidence. Available at: ww2.health.wa.gov.au/immunisationenrolment

Penalty \$10,000, for the provision of false or misleading information or documentation in relation to a child's immunisation status or circumstances.

Mandatory reporting to the Chief Health Officer

Under regulation 10C of the *Public Health Regulations 2017*, the Chief Health Officer may direct the relevant person in relation to a school or the person in charge of a child care service or community kindergarten to provide a report to the Chief Health Officer in respect of children enrolled with an immunisation status that is 'not up to date'. This will include any child enrolled as an exempt child. For more information, refer to the *WA Immunisation Requirements – Guidelines*, Section 4: Report under-vaccinated children. Available at: ww2.health.wa.gov.au/immunisationenrolment
