Self-isolation information for confirmed cases of COVID-19 in Western Australia

While some people who are diagnosed with COVID-19 will need to be managed in hospital, most people will have mild illness and can be managed at home in isolation.

**Can I go to work or school? Can I have visitors?**
No. Home isolation means you must stay at your home or hotel and restrict your normal activities.
You cannot go to work, school, childcare, university, recreation facilities, or public areas, or go shopping.
You should not allow people who do not have an essential need to be in the home to visit while you are in isolation.

**Note:** You can leave your home to seek medical care or because of an emergency. Wear a surgical mask when going out.

**Can I go into the garden or go for a walk?**
You can go into your private garden or courtyard or onto your private balcony if you have one.
You cannot leave your home unless it is to seek medical care or because of an emergency.

**Separate yourself from the other people in your home**
If you are sharing your home with others you should, as much as possible:

- remain separated from others
- wear a surgical mask when you are in the same room as another person
- use a separate bathroom, if available
- avoid shared or communal areas and wear a surgical mask when moving through these areas
- if you must share a room, do not do so with people who are at risk of severe disease, such as elderly people and those who have heart, lung or kidney conditions, and diabetes.

**Cover coughs and sneezes**
You should cover your mouth and nose with a tissue when you cough or sneeze, or cough or sneeze into your sleeve or elbow. Used tissues should be placed in a bin, and hands immediately washed with soap and water for at least 20 seconds.

**Wash your hands**
Avoid touching your eyes, nose, and mouth with unwashed hands. You should wash your hands often and thoroughly with soap and water for at least 20 seconds. You can use an alcohol-based hand sanitiser if your hands are not visibly dirty. Ensure you wash your hands or use a hand sanitiser:

- before entering an area where there are other people
- before touching things used by other people
- after using the bathroom
- after coughing or sneezing
- before putting on, and after removing, gloves and masks.

Avoid sharing household items
You should not share dishes, drinking glasses, cups, eating utensils, towels, bedding, or other items with other people in your home. After using these items, you should wash them thoroughly with soap and water or use a dishwasher/washing machine.

Do I need to be tested before leaving isolation?
You will be monitored by the Public Health Operations team who will provide you with a clearance certificate when you no longer need to self-isolate.

Prevention steps for caregivers and household members of confirmed cases
Only people who are essential for providing care to you should be in the home, if possible.

Caregivers and household members should follow the below advice to reduce their risk of infection.

Wear a surgical mask
Wear a surgical mask and disposable gloves when you are in the same room as the person with confirmed infection, or when you touch or have contact with the person’s blood, body fluids and/or secretions, such as sweat, saliva, sputum, nasal mucus, vomit, urine, or diarrhoea.

- Make sure your mask always covers your nose and mouth
- Throw out disposable surgical masks and disposable gloves after use
- Wash your hands immediately after removing the surgical mask and gloves.

Clean household surfaces
Clean all “high-touch” surfaces, such as counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables, at least once a day wearing disposable gloves. Also, clean any surfaces that may have blood, body fluids and/or secretions or excretions on them.

- Read labels of cleaning products and follow recommendations on product labels. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves or aprons and making sure the areas is well ventilated when using the product.
- Use a household disinfectant or a diluted bleach solution on hard surfaces. To make a bleach solution at home, add 1 tablespoon of bleach to 4 cups of water.
- Wear a surgical mask and disposable gloves while handling soiled items. Wash your hands immediately after removing gloves and masks.
- Wash laundry thoroughly
- Immediately remove and wash clothes or bedding that have blood, body fluids and/or secretions or excretions on them.
- Read and follow directions on labels of laundry or clothing items and detergent. In general, wash and dry with the warmest temperatures recommended on the clothing label.
- Dishes should be washed in a dishwasher where possible

health.wa.gov.au
Dispose of contaminated items
Place all used disposable gloves, surgical masks, and other contaminated items in a lined waste bin before disposing of them with household waste. Wash your hands immediately after handling these items.

Monitor symptoms
If you are a caregiver or household member and develop a fever, a cough, sore throat or shortness of breath, call your GP or the emergency department, unless it is a medical emergency (when you should call 000). Tell your GP or the emergency department that you are caring for, or living with, a person with confirmed COVID-19. Use a surgical mask when in the presence of other people, or when attending medical care.

Tips for you and your family to help cope with home isolation
Being in home isolation can be frightening, particularly for young children. Here are some tips for coping:

- Talk to the other members of the family about COVID-19 to reduce anxiety.
- Reassure young children using age-appropriate language.
- Keep up a normal daily routine as much as possible.
- Arrange with your employer to work from home, if possible.
- Ask your child’s school to supply assignments, work sheets and homework by post or email.
- Think about how you have coped with difficult situations in the past and reassure yourself that you will cope with this situation too. Remember that isolation won’t last forever.
- Keep in touch with family members and friends via telephone, email or social media.
- Exercise regularly at home. Options could include exercise DVDs, dancing, floor exercises, yoga, walking around the backyard or using home exercise equipment, such as a stationary bicycle, if you have it. Exercise is a proven treatment for stress and depression.
- Ask your family, friends or other members of the household to pick up your groceries and medicines for you. If this is not possible, you can order groceries and medicines (including prescription medicines) online or by telephone.
- Treat isolation as an opportunity to do some of those things you never usually have time for, such as board games, craft, drawing and reading.

What do I do if my symptoms worsen?
If you require urgent medical assistance call 000 and let them know you have been in self-isolation due to COVID-19.

If you do not require urgent medical assistance, you should contact your General Practitioner (GP) in the first instance. If your GP is not able to help, you can contact an after-hours GP telehealth service -

Other assistance for people in self-isolation

- If you need welfare assistance (e.g. food, medication, other essential items) phone Department of Communities on 1800 032 965
- If you need emergency dental assistance phone 0429 441 162
- If you need mental health assistance phone Beyond Blue on 1300 224 636

Implications for people who do not comply with the requirement to self-isolate

The WA government takes the health and wellbeing of the community very seriously. Directions under the Emergency Management Act 2005 have been issued with regard to self-isolation which must be followed. A person who does not comply with the directions is subject to a fine of up to $50,000 for individuals and $250,000 for bodies corporate.

More information

www.who.int/health-topics/coronavirus

We acknowledge that self-isolation is an inconvenience, however, it is essential for protecting your family, friends and the WA community

We thank you for your cooperation.
