0711/02 Papillary fibroelastoma

Q. Please confirm past coding advice for papillary fibroelastoma is still correct?

A. Past advice (WA decision W1592) is still correct. Fibroelastoma is a benign neoplasm of the heart, typically involving one of the valves e.g. aortic valve. ICD-10-AM does not have a specific code for this neoplasm.

The index look-up for benign papillary neoplasm instructs us to code papilloma. Assign:

D15.1 Benign neoplasm of heart
M8050/0 Papilloma NOS

DECISION

Papillary fibroelastoma should be coded:

D15.1 Benign neoplasm of heart
M8050/0 Papilloma NOS

[Effective 20 Jul 2011, ICD-10-AM/ACHI/ACS 7th Ed.]
