Neurology

WA Medical Workforce 2015 to 2025

In 2015, **44** neurology consultants were identified as working in Western Australia (WA).

Neurology supply is currently below demand with a low risk shortfall identified in 2015. Trainee throughput is insufficient to keep pace with the growth in demand or the expected number of retirements. More than one third of the 2015 workforce is expected to retire by 2025.

It is anticipated there should be employment opportunities in the future with medium and critical risk shortfalls projected for 2021 and 2025, respectively.

Shortfall risk assessment

Neurology had a low shortfall risk in 2015, becoming medium by 2021 and critical by 2025.

Critical	supply <70% demand
High	supply ≥70% and <80% demand
Medium	supply ≥80% and <90% demand
Low	supply ≥90% demand

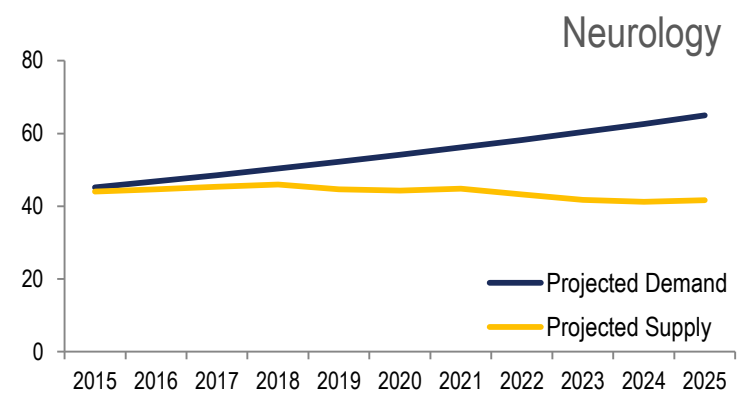
Projected consultant supply and demand 2015 to 2025

Projections indicate demand will exceed supply.

In 2025 the neurology workforce is projected to be 40 consultants.

Supply will be insufficient to meet expected demand of 60 consultants in 2025.



Workforce planning 2015 to 2025

Growth in demand: An estimated 1.01 consultants were needed in 2015 to service the growth in demand. This is expected to increase to approximately 1.27 consultants per annum by 2025.

Retirements: 43% of the 2015 workforce is expected to retire by 2025.

Vocational trainees: Currently producing 1.47 new consultants per annum which is insufficient to cover retirements or service the growth in demand.
