The next two questions will allow you to provide more detailed feedback on how to maximise improvements in each of the Directions or suggest other areas or actions for the Sustainable Health Review Panel to consider to develop a more sustainable health system.

13. In regards to the 12 Directions, please provide detailed comments on how to maximise improvements in each of the Directions. Where possible, please indicate which Direction your comments relate to.

Provision of an expert "navigator" will ease the burden on a system which is complex and ensure that the journey is person centred.

Achieving "person centred care" is an admirable objective which can be attained only by dialogue with not for profit organisations.

Person centred care should avoid postcode driven health care.

14. Is there anything else that the Panel has missed so far that is important in developing a more sustainable health system for Western Australia?
