The next two questions will allow you to provide more detailed feedback on how to maximise improvements in each of the Directions or suggest other areas or actions for the Sustainable Health Review Panel to consider to develop a more sustainable health system.

13. In regards to the 12 Directions, please provide detailed comments on how to maximise improvements in each of the Directions. Where possible, please indicate which Direction your comments relate to.

Rural Health.

1. I have never seen ramping of ambulances in a rural hospital and transfers to metro are expensive so maintain investment in the rural hospital and health for a faster health service.
 2. Telehealth is a good initiative.
 3. Coordinate with the education dept for preventative health measures for instance the closing of the Moora Residential College will increase unemployment and take away the educated youth from that area, so all in all raising the low socio-economic population with lesser educated population and a higher aged care population as well. As the report states the rural population require more education on health not less.
- Thank you kindly for the opportunity.
Stewart.

14. Is there anything else that the Panel has missed so far that is important in developing a more sustainable health system for Western Australia?
