Publication of Submissions

Please note all Public Submissions will be published unless otherwise selected below

- I do not want my submission published
- I would like my submission to be published but remain anonymous

Submission Guidance

You are encouraged to address the following question:

In the context of the Sustainable Health Review Terms of Reference listed below, what is needed to develop a more sustainable, patient centred health system in WA?

- Leveraging existing investment in Primary, Secondary and Tertiary healthcare, as well as new initiatives to improve patient centred service delivery, pathways and transition;
- The mix of services provided across the system, including gaps in service provision, sub-acute, step-down, community and other out-of-hospital services across WA to deliver care in the most appropriate setting and to maximise health outcomes and value to the public;
- Ways to encourage and drive digital innovation, the use of new technology, research and data to support patient centred care and improved performance;
- Opportunities to drive partnerships across sectors and all levels of government to reduce duplication and to deliver integrated and coordinated care;
- Ways to drive improvements in safety and quality for patients, value and financial sustainability, including cost drivers, allocative and technical efficiencies;
- The key enablers of new efficiencies and change, including, research, productivity, teaching and training, culture, leadership development, procurement and improved performance monitoring;
- Any further opportunities concerning patient centred service delivery and the sustainability of the WA health system.

Submissions Response Field

Please type your response into the field below. Alternatively you may provide your submissions as a separate attachment (Suggested Maximum 5 pages).

Empowerment for all individuals to Health and Wellness and Healing .

To return to True Holistic Care through the Art of Healing

Through reconnecting The Physical Emotional Mental and Spiritual Bodies to the true meaning of Holism in its deepest and purist form.

The reconnection of communities by developing Caring Heart Centred Communities.

Developing Education Programs for Healing for all who work in the Government Health Industry.

Develop a model of Health Care where all persons in Western Australia can choose whether they see a Medical practitioner or a Holistic Healer. Eg Traditional Healer or a Holistic Intergrative Therapist as per models of health care provision in the USA Canada and in all countries in the world with the exception of Australia. (South Australia are the only State which has Legislation allowing Aboriginal people to see either an traditional healer or a medical practitioner.

The pure medical model is not working and many people have lost faith , as seen in the current Senate Enquiry into the intra Vaginal Sling and Pelvic Mesh Disaster.

People are not prepared to continue popping pills any more and seek out other methods of care where they are cared for and nourished as a whole person , not just a number on a factory production line.a commodity. Health Care needs to be rehabilitated so it can finds it's Heart again. It seems the Industry filled with great professionals are not giving the time for being with their patients and are solely caught up in a culture of doing rather than being connected .
