Changing your password

If you have an Office 365 (O365) account, the best way to change your password is via office.com

1. Go to office.com and sign in with your HENumber@health.wa.gov.au and current WA Health Password. (If your password has expired, you will need to contact the Service Desk on 13 44 77 or recover your account if you have registered for Self-Service Password registration).
2. Select your initials or picture in the top right-hand corner
3. Click “My Account”
4. Click “Security and Privacy”
5. Click “Password – Change your Password”
6. Follow the prompts to create a new password. Your password must be at least 8 characters and not easily deciphered by others.
